DEHN at the Intersolar Europe 2018 in hall A2, stand 536

All safe – one flash ahead of the storm

From 20 – 22 June you will find DEHN at the leading platform for the solar industry - the Intersolar in Munich, hall A2, stand 536. Whether kilowatt or megawatt systems, DEHN protects your investments across the globe against interruptions caused by lightning currents and surges. Practical solutions show how lightning and surge protection can increase the availability of photovoltaic systems in conjunction with the network infrastructure, battery storage or electromobility.

DEHN protects both rooftop systems for private supply and large photovoltaic power stations with storage systems against disturbances and downtime caused by lightning currents and surges – on all continents and under the most diverse climatic conditions. A worldwide network of 23 subsidiaries and sales partners in over 70 countries is responsible for spreading know-how, selling products and providing service. Aside from a wide product spectrum, DEHN has a team of experienced experts at its disposal. Risk analysis, engineering and testing are part of the service package in the same way as protection concepts. DEHN's knowledge and experience is helpful when it comes to finding the right sustainable protection concepts and optimising existing solutions.

DEHN provides safety for today's and tomorrow's solutions
