

# DEHN Site: Pitești, Romania

Update: 06/2025

## About DEHN

- DEHN is a leading, international family-owned electrical engineering company based in Neumarkt, Germany
- The company offers solutions and services for lightning and surge protection as well as safety equipment - fields in which, with more than 900 patents and utility models, DEHN is a leading innovator
- 115 years of experience
- > 2,500 employees worldwide
- ~ €470 million turnover (FY 23/24)

## Successful growth means seizing opportunities

- The megatrends of our time, such as electric mobility, renewables and digitalisation, hold huge global business potential
- Our ambitious growth strategy is to double our revenue by 2030. The European markets are of particular importance in this respect
- We require extra production capacity to serve our European markets
- The new site in Pitești ideally supplements our global production network
- After an intensive evaluation of several cities and regions throughout Europe, the decision was made in favour of CTPark in Pitești, northwest of the Romanian capital Bucharest
- CTPark offers excellent infrastructure and transport connections. What is more, experienced specialists and reliable partners are available locally

## Our vision for the Pitești site

- We plan to invest ~ €10 million in manufacturing equipment for our new site
- Installation and commissioning will take ~10 months with start of production scheduled for mid 2026
- The production portfolio will comprise high-mix low-volume surge protective devices
- We will create ~150 new jobs on site in the coming years
